

The GFS drop-arm awning system can be adjusted to precisely the right angle to allow for shade where needed while permitting sufficient light and airflow, particularly with the use of screen mesh fabrics, and with the option to completely cover the window, if needed.

This makes it a very versatile awning and the ideal answer for windows verandahs, balcony's etc.

Remember that with any type of awning you will reduce the need for air conditioning. Screen mesh fabrics can minimize the heat and yet let the light through minimizing the use of lights in the day time. So help to reduce your energy foot print on the planet and consider screening your glass areas from the harsh effects of the sun.

GFS have a wide range of sun control products to provide you with a shade solution for most situations to help make your living areas more comfortable.
